Type Biovest Fire

Type Biovest 70's

Type Biovest Smile

The Biovest bags are made for a correct storage of your mask, offering high efficiency against microbial penetration, aerosols and airborne particles. High performance and greater durability (more than 50 washes) without losing features. Made with great care in Talavera de la Reina (Spain).

Efficiency to the penetration of airborne particles (+94%) and aerosols (+95%).

High bacterial filtration efficiency, superior to 93%.

HQ drawstring bag, avoiding unconscious manipulation of the inside of the bag.

Easy opening - closing string and perfect length for handling the bag.

Resistant to abrasion, breakage and tension.

Free of harmful and / or toxic ingredients and high anti-pilling fabric (it does not generate lint).

Soft bag on the skin: All areas of the bag in contact with the skin do not cause irritation.

This product is neither a PPE nor a medical device. Personal use.

CARE INSTRUCTIONS:

Mild wash 60°

Do not bleach

Iron to 140° for 10-15 seconds

Do not dry clean

Tumble dry at low temperature (70°)
